RVNA recognized as being in the Home Care elite.

This recognition is by an independent organization – OCS.

Rehabilitation and Visiting Nurse Association has been recognized by Outcome Concept Systems' (OCS) 2006 'Home Care Elite' compilation as being in the top 25% of the nation's home health care providers. This list measures quality, improvement and financial performance.

OCS gathered the publicly available information from CMS's Home Health Compare and cost reports. Agencies were scored on quality of care, quality improvement and financial performance. OCS then compared each Home Health Agency's performance in the three domains against that of the other organizations in its state and in the country. The combined score uses a methodology that gave the greatest importance to quality of care.
